COLLEGE OF PHYSICIANS AND SURGEONS PAKISTAN
7th Central Street, Defence Housing Authority, Karachi-75500.
Phone No. 99207100-10 UAN: 111-606-606 Fax No. 99266432

ABOUT THE COLLEGE

The College was established in 1962 through an ordinance of the Federal Government. The objectives/ functions of the College include promoting specialist practice of Medicine, Surgery, Obstetrics & Gynaecology and other specialties by securing improvement of teaching and training, arranging postgraduate medical, surgical and other specialists training, holding and conducting examinations for awarding postgraduate degrees of the College, admission to the Fellowship of the College, and to provide for research.

Since its inception, the College has taken great strides in the direction of improving postgraduate medical and dental education in Pakistan. Structured training programs along with criteria for accrediatation of training institutions, and for the appointment of supervisors and examiners have been developed. The format of examinations has evolved over the years to achieve objective and reliable methods of assessment. The recognition of the standards of College qualifications nationally and internationally, has enormously increased the number of trainees, and consequently the number of training institutions and the supervisors. This increasing demand coupled with advancement in medical sciences has gradually increased the number of fellowship disciplines to sixty four and of membership to twenty.

The average number of candidates taking CPSP examinations each year is to a minimum of 25,000. The College conducts examinations for FCPS I (11 groups of disciplines), IMM, FCPS II (64 disciplines), MCPS (20 disciplines), including MCPS in HPE and also Diploma in Health Care System Management (DCPS-HCSM). A large number of Fellows and senior medical teachers from within the country and overseas are involved at various levels of examinations of the College.

To coordinate the training and examination, and to provide assistance to the candidates stationed at places other than Karachi; College has established 14 Regional Centers Including five Provincial Headquarter Centres in the country. The five Provincial Headquarter Centers in addition to organizing the capacity building workshops/short courses also have facilities of libraries and I.T.

It is important to note that in the overall scenario of health care delivery service, out of the total functioning and registered health care specialists in the country, over 85% have been provided by the CPSP. The College strives to continue its efforts in making its courses and training programs evidence and need based so as to meet international standards as well as to cater to the specialist healthcare needs not only for this country but also for the entire region.

Prof. Zafar Ullah Chaudhry
President
College of Physicians
and Surgeons Pakistan

INTRODUCTION

The College of Physicians and Surgeons Pakistan has always designed its postgraduate training programs keeping in consideration the national and international needs. In Pakistan attempts have been made to improve the health status of the people through availability of trained personnel, adequate supply of medicines and establishment of greater number of health facilities. However, much more needs to be done in this respect.

The main health related problems facing Pakistan are preventable communicable and non-communicable diseases, severe malnutrition and high incidence of birth resulting in high infant and maternal mortality. It is evident from the dismal health related statistics that efforts should be directed at improving healthcare facilities at the primary and secondary care levels. A need was therefore felt to train a group of mid level specialists who can provide quality services at these centers. The curriculum and training for MCPS have been developed to achieve this objective.

This booklet provides information to the trainees and supervisors regarding training requirements and assessment strategy for the MCPS in Family Medicine.

MCPS EXAMINATION

The College conducts MCPS examination in the following 20 disciplines:

1. Anaesthesiology
2. Clinical Pathology
3. Community Medicine
4. Dermatology
5. Diagnostic Radiology
6. Family Dentistry
7. Family Medicine
8. Forensic Medicine
9. Obstetrics & Gynaecology
10. Operative Dentistry
11. Ophthalmology
12. Oral Surgery
13. Orthodontics
14. Otorhinolaryngology
15. Paediatrics
16. Periodontology
17. Prosthodontics
18. Psychiatry
19. Pulmonology
20. Health Professions Education (HPE)

GENERAL REGULATIONS

The following regulations apply to all candidates entering for MCPS examination:

Candidate will be admitted to the examination in the name (surname and other names) as given in the MBBS degree. CPSP will not entertain any application for change of name on the basis of marriage/ divorce / deed.

REGISTRATION AND SUPERVISION

All trainings must be supervised, and trainees are required to register with the RTMC within 30 days of the start of the training for MCPS. In case of delay in registration, the start of training will be considered from the date of receipt of application by the RTMC. Registration forms are available with RTMC and at the Regional Centers. They can also be downloaded from the CPSP Website. Training is compulsorily monitored by an approved supervisor who is a CPSP fellow or a specialist with relevant postgraduate qualifications and requisite experience, registered with the RTMC. The trainees are not allowed to work simultaneously in any other department/institutions for financial benefit and /or for another academic qualifications.

APPROVED TRAINING CENTRES

Training must be undertaken in units, departments and institutions approved by the College. A current list of approved institutions is available from the College and its Regional Centres as well as on the College website: **www.cpsp.edu.pk**

DURATION OF TRAINING

The duration of training for MCPS is two years; MCPS examination is taken on completion of the specified training and other requirements.

MANDATORY WORKSHOPS

All candidates will attend following Mandatory Workshops and present certificate of attandence before they can be allowed to take the MCPS examination:

1. Introduction to Computer and Internet
2. Primary Surgical Skills
3. Communication Skills
4. Basic Life Support

ELIGIBILITY REQUIREMENTS FOR MCPS EXAMINATION

- Eligibility requirements for MCPS examination:
- MBBS or equivalent qualification registered with the PMDC.
- One year house job in an institution recognized by the CPSP.
- Registered with the Registration and Training Monitoring Cell (RTMC).
- Completed two years of RTMC registered training under an approved supervisor in an institution recognized by the CPSP. A certificate of completion of training must be submitted, verifying that the rotational training in the specified disiciplines for the required period has also been undertaken. The trainees are required to complete entries in e-logbook along with validation by the supervisor.

  OR

  5 years of General Practice with evidence of 50 hours of CME/CPD.
- Submitted certificates of attendance of mandatory workshops

EXAMINATION SCHEDULE

- The MCPS theory examinations in Family Medicine are held twice a year.

- Theory examinations are held in different cities of the country depending on the number of candidates at a center. Presently the centres are Abbottabad, Bahawalpur, Rawalpindi, Faisalabad, Hyderabad, Islamabad, Karachi, Lahore, Larkana, Nawabshah, Multan, Peshawar and Quetta. The College's decision to hold theory/clinical examinations depends on the number of candidates in a city and candidates will be informed accordingly.

- Clinical examinations will be held for those candidates who have qualified in theory.

- English is the medium of examination for the theory/practical/clinical and viva examinations.

- Any change in the centres, dates and format of the examination will be notified by the College before the examination.

- Each successful candidate in the MCPS examination shall be granted MCPS diploma after being elected by the College Council and payment of registration fee and other dues as per rules of the College.

- A competent authority appointed by the College has the power to debar any candidate from any examination if it is satisfied that such a candidate is not a fit person to take the College examination for using unfair means/misconduct or other disciplinary reasons.

EXAMINATION FEE

- Application along with the prescribed examination fee and required documents should be submitted latest by the last date notified for the purpose before each examination.

- The details of examination fee and fee for change of centre, subject, etc. shall be notified before each examination.

- All fee is payable by bank draft/pay order made out to the "College of Physicians & Surgeons Pakistan". Personal cheques and postal orders are not accepted. However fee can be paid in cash at the accounts department of the CPSP at Karachi or at specified branches of UBL.

Refund of fee

- After submitting an application for examination, if a candidate decides not to appear, a written request for the same should be submitted up to the last date of the receipt of application. In such cases the refund is admissible to the extent of 75% of fee only. No request for refund will be accepted after the last date of receipt of the application.

- Fee deposited for a particular examination shall not be carried over to the next examination in case of withdrawal/absence/exclusion.

- In case the application for examiantion of a candidate is rejected by the CPSP, 75% of the examination fee will be refunded, after deducting 25% as processing charges. No refund will be made, for fee paid for any other reason, e.g. late fee, change of centre/subject fee.

TRAINING PROGRAM

Objectives of the training program

At the end of the training for MCPS Family Medicine, the candidate shall be able to:

- Diagnose and manage independently the common presentations encountered in family practice (details below)
- Recognize and refer conditions that need to be managed by appropriate specialists because of their severity or their potential complications. Family physicians may begin treatment or initiate stabilization (conditions listed below)

Evaluate common clinical presentations

CONDITION/SKILL	COMPETENCY		
	Diagnose	Manage	Refer
Cardiovascular System			
Hypertension	√	√	√ (Secondary, complicated, uncontrolled)
Coronary artery disease	√	Initial stabilization	√
Dyslipidemia	√	√	√ (High risk)
Heart Failure	√	Initial stabilization	√
Arrhythmias	√		√
Rheumatic fever	√		√
Syncope	√	Manage Vasovagal	√ (Refer all others)
ECG	√	Interpretation of common findings	
Cardiovascular risk assessment	Perform, interpret and manage using risk assessment tools.		

CONDITION/SKILL	COMPETENCY		
	Diagnose	Manage	Refer
Cardiovascular System			
Tuberculosis	√	√	√ (Complicated, relapse)
Community acquired Pneumonia	√	√	√ (Complicated)
COPD	√	√ (Mild cases)	√ (Moderate to severe)
Asthma	√	√ (Mild to Moderate cases) (Initial stabilization of acute exacerbation)	√ (Severe)
Chest X Ray	√ Interpretation of common clinical findings and refer when indicated		
Peak flow meter	Perform, interpret and manage.		
Inhaler and spacer	Teach correct inhaler (spacer) technique		
Nebulizer	Appropriate and Correct use of nebulizer		
Screening of Family Members for Tuberculosis	Apply clinical guidelines Smoking cessation Initiate smoking cessation counseling		

CONDITION/SKILL	COMPETENCY		
	Diagnose	Manage	Refer
Endocrine and Metabolic			
Diabetes Mellitus	√	√	√ (Type 1, Complicated Type 2)
Thyroid			
- Hypothyroidism	√	√	√ (Complicated)
- Hyperthyroidism	√		√
- Thyroid nodule	√		√
Osteoporosis	√	√	√ (Complicated)
Vitamin D and B12 deficiency	√	√	√ (Complicated)
Obesity	√	√	√ (Complicated)
- Blood sugar tests - Thyroid Function test - Bone mineral density scan	√ Interpretation of reports		

CONDITION/SKILL	COMPETENCY		
	Diagnose	Manage	Refer
Gastrointestinal System			
Diarrhea	√	√ resolving or severe)	√ (complicated, non
Gastritis and Gastro esophageal reflux disease	√	√	√ (Complicated)
Constipation	√	√	√ (Complicated)
Hepatitis A & E	√	√	√ (Severe or complicated)
Hepatitis B & C	√		√
Irritable bowel disease	√	√	√ (Complicated)
Dehydration	Diagnosis, assessment of severity and appropriate management		
Liver Function test Hepatitis serology	Perform and interpret		
Abdominal ultrasound	Interpret and refer when indicated		
Upper and Lower GI endoscopy	Appropriately select		

CONDITION/SKILL	COMPETENCY		
	Diagnose	Manage	Refer
Hematology and Oncology			
Anemia	√	√ (Iron Deficiency, Folate and B12)	√ (Complicated)
Thrombocytopenia, Neutropenia & Pancytopenia	√	Initial stabilization	√
Cancers, hemoglobinopathies and Bleeding disorders	√ (Recognize)		√
Cancer prevention	Appropriate screening practices		
Complete Blood count & peripheral blood picture	Interpret and manage/refer appropriately		

CONDITION/SKILL	COMPETENCY		
	Diagnose	Manage	Refer
Infectious Disease			
Enteric fever Malaria Viral fever (Dengue) Fever due to immunizable disease	√	√	√ (Complicated)
Amoebiasis, Giardiasis	√	√	√ (Complicated)
Helminth infections	√	√	√ (Complicated)
Viral Varicella and Herpes zoster	√	√	√ (Complicated)
Sexually transmitted diseases (STD)	√	√	√ (Complicated)
Tuberculosis (Extra pulmonary)	√	√	√ (Complicated)
Tests for - Malaria - Typhoid - Tuberculosis - Dengue IgM - STD	Appropriate selection and interpretation		

CONDITION/SKILL	COMPETENCY		
	Diagnose	Manage	Refer
Neurology			
Headache	√	√ (Simple Migraine, Tension headache)	√ Secondary causes)
Stroke	√	√ (Initial stabilization)	√
Post stroke rehabilitation	√		√ (if needed)
Seizures	√	√ (Initial stabilization)	√
Meningitis	√	√ (Initial stabilization)	√
Dementia	√		√

CONDITION/SKILL	COMPETENCY		
	Diagnose	Manage	Refer
Rheumatology and Orthopedics			
Osteoarthritis	√	√	√ (Complicated)
Septic arthritis and osteomyelitis	√	√ (Stabilize)	√
Gout	√	√	√ (Complicated)
Rheumatoid arthritis	√		√
SLE and seronegative arthritis	√		√
Back pain	√	√ (Mechanical)	√ (Others)
Tenosynovitis	√	√	√ (Complicated)
Carpel tunnel syndrome	√	√	√ (Complicated)
Shoulder pain	√	√	√ (Complicated)
Joint and Musculoskeletal examination	Proficiency in examination		
Joint X-Rays RA factor ASOT SR/CRP	Appropriate selection and interpretation		

CONDITION/SKILL	COMPETENCY		
	Diagnose	Manage	Refer
Peadiatrics			
Low Birth Weight	√	√	√ (Complicated)
Malnutrition	√	√	√ (Complicated)
Acute Upper & Lower Respiratory Tract Infections	√	√	√ (Complicated)
Diarrhea	√	√	√ (Complicated)
Anaemia	√	√	√ (Complicated)
Infectious diseases	√	√	√ (Complicated)
Bronchial asthma, bronchiolitis	√	√	√ (Complicated)
Otitis media	√	√	√ (Complicated)
Intestinal parasitic infections	√	√	√ (Complicated)
Febrile seizures	√	√	√ (Complicated)
Common injuries, minor burns, nappy rash	√	√	√ (Complicated)
Feeding disorders	√	√	√ (Complicated)
Failure to thrive	√	√	√ (Complicated)
A good pediatric history and do a good physical examination	√	√	√ (Complicated)
Neonatal examination and assessment	√	√	√ (Complicated)
Well child care	√	√	√ (Complicated)
Normal nutrition and feeding advice	√	√	√ (Complicated)
Growth monitoring	√	√	√ (Complicated)
Rehydration	√	√	√ (Complicated)
Developmental assessment and monitoring	√	√	√ (Complicated)
Immunizations	√	√	√ (Complicated)

CONDITION/SKILL	COMPETENCY		
	Diagnose	Manage	Refer
Dermatology			
Acne			
Allergic dermatosis	√	√	√
Impetigo, furuncles	√	√	√ (Carbuncle)
Cellulitis	√		√
Diaper dermatitis	√	√	√
Drug rashes including mild Steven-Johnson Syndrome	√		√ (Others)
Eczema	√	√	√ (Complicated)
Fungal skin infections	√	√	√ (Complicated)
Herpes simplex and zoster	√	√	√ (Complicated)
Pediculosis	√	√	√ (Complicated)
Molluscum contagiosum			√
Paronychia	√	√	√ (Complicated)
Psoriasis			√
Scabies	√	√	√
Seborrheic dermatitis	√	√	√ (Complicated)
Urticaria	√	√	√ (Complicated)
Verrucae	√		√

CONDITION/SKILL	COMPETENCY		
	Diagnose	Manage	Refer
Psychiatry			
Anxiety disorders	√	√	√ (Complicated)
Depression		√	√ (Severe, suicidal, psychotic)
Somatoform disorders	√		√ (Complicated)
Surgery			
Animal Bites	√	√ (Dog, cat, rat)	√ (Complicated)
Minor burns and injuries	√	√	√ (Complicated)
Acute Abdomen (Bowel Obstruction, Urinary Tract Obstruction	√		√
Bed sores	√	√	√ (Complicated)
Breast disorders	√ (and Screening)	√ (Mild, Breast abscess, cracked nipples)	√ (Breast lumps)
Arterial and Venous problems	√		√
Inguinoscrotal swellings	√		√
Gall Bladder Disease	√		√
Skills (To be able to perform the following skills)			
Dressings and bandaging			
Digital rectal examination			
Enema administration			
Removal of faecal impaction			
Urinary Catheterization			
Abdominal Xray	Interpretation		
Abdominal Ultrasound	Appropriate selection		

CONDITION/SKILL	COMPETENCY		
	Diagnose	Manage	Refer
Nephrology and Urology			
Urinary tract infection	√	√	√ (Complicated)
Calculi of urinary tract	√	√	√ (Complicated)
Chronic renal failure	√		√
Urinary retention	√	√ (Stabilize acute)	√
Benign Prostatic enlargement	√	√ (Mild)	√
Urinalysis	Interpretation		
Test - Renal ultrasound - X-Ray KUB	Appropriate selection		

CONDITION/SKILL	COMPETENCY		
	Diagnose	Manage	Refer
Obstetrics and Gynaecology			
Menstrual disorders	√	√	√ (Complicated)
Common causes of vaginal discharge and Pelvic inflammatory disease	√	√	√ (Complicated)
Antenatal care	√	√	√ High Risk & 3rd trimester
Urinary tract infections in pregnancy	√	√	√ (Complicated)
Puerperal sepsis	√		√
Infertility	√		√
Urinary incontinence	√	√ (Stress)	√ (All others)
Ovarian cysts and tumors Cancers of genital tract	√		√
Nutritional guidance for mothers	Perform		
Family Planning and Counseling	Perform		
Pap smear	Perform		
Menopause	Advise preventive measures		
PapsmearInfertility test	Interpretation		
Pelvic Ultrasound	Appropriate selection		

SKILL	COMPETENCY
Special Competencies	
Effective communicator	with patients, families, team members and colleagues
Effective practice manager	Apply principles of practice management to the practice
Ethical practice	Apply principles of ethics in practice

CONDITION/SKILL	COMPETENCY		
	Diagnose	Manage	Refer
EYE/ENT			
Blepharitis	√	√	√ (Complicated)
Conjunctivitis	√	√	√ (Complicated)
Corneal abrasion	√		√
Hordeolum (styes)	√	√	√
Acute visual loss / Acute eye pain	√		√
Cataract	√		√
Strabismus	√		√
Allergic, acute, atrophic rhinitis	√	√	√ (Complicated)
Epistaxis	√	Stabilize	
Otitis media and externa	√	√	√ (Complicated)
Pharyngitis, Laryngitis	√	√	√ (Complicated)
Sinusitis	√	√	√ (Complicated)
Thrush	√	√	√ (Complicated)
Tonsillitis	√	√	√ (Complicated)
Viral respiratory tract infections	√	√	√ (Complicated)
Appropriate ear, nose and throat examination			
Use of otoscope			

The training will constitute rotations in the following in an institution recognized by the CPSP.

- Emergency / accident 2 months
- Paediatrics OPD 5 months
- Medicine 7 months
- Dermatology OPD 1 months
- Psychiatry 2 months
- Eye OPD/ENT OPD 1 month
- OBS/GYN 2 months
- Rotation in the following:
  (each session of 4 hours/day)
- Population planning clinics 1 week
- Clinical Pathology laboratory 1 week
- Radiology and imaging techniques 2 weeks
- Elective 3 months

The elective period can be spent in one session of three months OR in two sessions of 1.5months each in:

- Any of the departments listed in the section aboveOR
- Surgery in an institution recognized by the CPSPOR
- Attachment in a District Hospital/Rural Health Centre (RHC) / Primary Care centre run by PMDC recognized medical colleges OR with a FCPS (FM) Family Medicine qualified practitioner in their own practices provided the approval of the College is obtained before starting the elective. To obtain this approval the candidate will submit an application at least six months in advance with the following details:
  i. Name of the clinic / hospital where elective will be done.
  ii. Qualifications and experience of the incharge of District hospital/ RHC/Primary care centre / Family practitioner.

Note: Institutions offering slots in MCPS Family Medicine are required to identify a supervisor who will be responsible for signing a certificate attesting that the trainee has rotated through all the disciplines as stated in the prospectus. This Certificate must be submitted along with the application for taking the examination.

SYLLABUS

The outline of various topics given in this syllabus is a guide to what at the moment are considered to be important topics which the candidate is expected to know. This is to help both the candidate and the examiner in defining the minimum boundaries of MCPS examination.

- Nutrition, weight loss, fatigue, malnutrition and obesity.
- Fever, general and of specific organ systems.
- Vomiting, diarrhea, constipation, indigestion, dehydration and jaundice.
- Diagnosis, management and control of the following communicable disease: Poliomyelitis, diphtheria, tetanus, measles, tuberculosis, hepatitis, mumps, rubella, salmonella infections, AIDS and other sexually transmitted diseases.
- Immunization of children and adults.
- Parasitic infections.
- Palpitation, anaemia, hypertension, coronary heart disease.
- Diabetes mellitus.
- Cough, upper and lower respiratory tract infection.
- Shortness of breath including asthma.
- Urinary tract infections, haematuria and disorders of micturition.
- Tremors and abnormalities of gait.
- Fits including Epilepsy.
- Back pain, shoulder and neck pain, elbow pain.
- Oedema, general and local.
- Swelling, lumps.
- Abscesses and local inflammation, varicose veins.
- Loss of hearing and vision. Red eye.
- Common dermatological conditions.
- Early detection and prevention of neoplasia.

- Initial management of all medical and surgical emergencies.
- Poisoning and adverse drug reaction.
- Insect and animal bites rabies, tetanus.
- Haemorrhage and bleeding from different sites
- Common behavioral and socio-cultural problems.
- Addictions, depression and sleep disorders.
- Pregnancy, antenatal care, family planning, infertility.
- Disorders of menstruation and vaginal discharge.
- Paediatric assessment, problems of the newborn, well child care, elderly care.
- Rational drug use.
- Communication skills in clinical practice.

FORMAT OF EXAMINATION

Since the College is continually seeking to improve and standardise it's examinations, changes are likely from time to time and candidates will be notified well in advance of such changes.

The MCPS examination comprises of:

I. Theory:

Paper I 10 Short Answer Questions (SAQs) 3 hrs

Paper II 10 Short Answer Questions (SAQs) 3 hrs

II. Clinical:

The clinical examination will comprise of TOACS (There will be 12 stations with 6 minutes allocated to each. There will be two types of stations (static and interactive).

Only those candidates who qualify in theory will be called for Clinical and TOACS examination.

Note: The candidate is required to fill a self explanatory 'feedback form at the end of the examination.

E-LOGBOOK

The CPSP Council has made e-logbook mandatory for all residency programs trainees inducted in July 2011 and onwards. Upon registration with RTMC each trainee is allotted a registration number and a password to log on and make entries of all work performed and the academic activities undertaken in e-logbook on daily basis. The concerned supervisor is required to verify the entries made by the trainee. This system ensures timely entries by the trainee and prompt verification by the supervisor. It also helps in monitoring the progress of trainees and vigilance of supervisors.

The College reserves the right to alter/amend any rules / regulations.

Any decision taken by the College on the interpretation of these regulations will be binding on the applicant.
